# CSU Connection

SEPTEMBER

**September is  
Childhood  
Cancer  
Awareness  
Month**

## Reminder:

CSU offices will be closed Monday,  
September 6 for Labor Day

## Quote of the Day:

“THE GREATEST DISCOVERY OF ALL  
TIME IS THAT A PERSON CAN  
CHANGE THEIR FUTURE BY MERELY  
CHANGING HIS ATTITUDE ”

-OPRAH WINFREY

## **Our Mission**

is to deliver outstanding  
IT support to your  
business in order to improve  
uptime, productivity, and  
profitability.

You take care of running your  
business. We'll take care of  
your technology.

Sherman, President  
of Computer Services  
Unlimited.

## **Why Your Business Is The PERFECT Target For Hackers... *And What You Need To Do NOW To Protect Yourself***

Everybody gets hacked, but not everything makes the evening news. We hear about big companies like Target, Home Depot, Capital One, and Facebook getting hacked. What we rarely hear about are the little guys – the small businesses that make up 99.7% of employers in the United States, according to the Small Business Administration. It's these guys who are the biggest targets of cybercriminals.

Basically, if you run a business, that business is a potential target. It doesn't matter what industry you're in, what you sell or how popular you are. Cybercriminals go after everybody. In 2019, a cyber security survey by the Ponemon Institute found that 67% of small and midsize businesses in the U.S. and U.K. were hit by a cyber-attack.

For the cybercriminal, casting a wide net makes the most sense because it gets results. It puts them in a position where they are able to extort money, steal sensitive information and

ultimately profit off of destroying the property, prosperity and reputation of others.

Why do cybercriminals love to target small businesses? There are a handful of reasons why small businesses make sense to attack.

### **1. Small Businesses Are The Most Vulnerable.**

Business owners, entrepreneurs and executives aren't always up-to-date on network security, current cyberthreats or best practices in IT. They have a business to run and that's usually where their focus is. Unfortunately, that means cyber security can take a back seat to other things, like marketing or customer support. This also means they might not be investing in good network security or any IT security at all. It's just not top-of-mind or they may feel that because it's never happened to them, it never will (which is a dangerous way of thinking).

## 2. Small Businesses Don't Take IT Security Seriously.

Coming off that last point, it's true that many businesses don't properly secure their network because they feel that they *aren't* vulnerable. They have the mindset of "It hasn't happened to me, so it won't." Along those same lines, they might not even take password security seriously. According to research conducted by Trace Security, upward of 80% of ALL breaches come down to one vulnerability: weak passwords! Even in 2020, people are still using passwords like "12345" and "password" to protect sensitive data, such as banking information and customer records. Secure passwords that are changed regularly can protect your business!

## 3. Small Businesses Don't Have The Resources They Need.

Generally speaking, medium to large companies have more resources to put into IT security. While this isn't always true (even big companies skimp on cyber security, as the headlines remind us), hackers spend less time focused on big targets because they assume it will take more of their own resources (time and effort) to get what they want (money and sensitive data). Many small businesses lack the resources like capital and personnel to put toward IT security, so hackers are more confident in attacking these businesses.

Just because you haven't had any major problems for years – or at all – is a bad excuse for not maintaining your computer systems. Threats are growing in number by the day. While many small businesses might think, "I don't have the time or resources for good security," that's not true! You don't need to hire IT staff to take care of your security needs. You don't need to spend an arm and a leg securing your network. IT security has come a LONG way in just the last five years alone. You can now rely on IT security firms to handle all the heavy lifting. They can monitor your network 24/7. They can provide you with IT support 24/7.

That's the great thing about technology today – while many hackers are doing everything they can to use technology against us, you can use it against them too. Work with a dedicated and experienced IT security firm. Tell them your business's network security needs, and they'll go to work fighting the good fight against the bad guys.

**"67% of small and medium-sized businesses in the US and UK were hit by a cyber-attack."**

## Shiny New Gadget Of The Month: 'Peep' The World Around You

Peeps by CarbonKlean is the ultimate cleaning tool for glasses – far better than your traditional rag, spray or T-shirt. It's compact, easy to use and, most importantly, revolutionary in its ability to not only clean smudges off your glasses but also protect them from the next smudge.

Peeps uses state-of-the-art carbon molecular technology to remove smudges and dirt at a microscopic level as well as keep your lenses clear of contaminants long after you use it.

To clean your lenses with Peeps, simply brush them to remove dust and particles, wipe them between the heads of the tongs and enjoy your crystal-clear vision!

# How To Succeed In Business And Life In Just 8 Hours Per Week

By: Darren Hardy

Do you want to know my secret to success – how I’m able to live the way I do after growing up in a dysfunctional family, lasting half a semester in college and possessing no special skills, talents or intelligence? Well, I do two things that most people don’t do: I study and I plan.

I pull these two levers once every day (and twice on Sunday), and that’s what has led to three decades of success. You can follow my example. Like all fundamentals of success, the daily disciplines of studying and planning are easy to understand, but hard to maintain in practice. Most people don’t have discipline, and, therefore, they do not succeed. What’s more is that in total, you only have to study and plan for eight hours every week! Curious about how that works? Let me break it down for you.

Early each morning, I give myself an hour to study and plan as needed. No matter how early the rest of my day starts, I always start with this hour – no exceptions. I devote the first 30 minutes to studying. When I say “studying,” what that basically means is that I’m reading a book to grow one of my core skills. Don’t spend that first 30 minutes reading useless crap; only focus on books that will help you grow in some way.

If your response to that idea of studying was that you don’t have time to read, then I would say you’re lying. Bill Gates, Warren Buffett, Oprah Winfrey, Elon Musk and Jack Ma are all voracious readers. Do you think you’re busier than them? Yeah, thought not. They’re not the only ones either – the average multimillionaire reads at least two books a month. And guess what? I can get through that many books in a month by reading just 30 minutes a day.

I spend the remaining half of the first hour of my day planning. That means I review my MVPs (most valuable priorities) and walk through my day in my head. Thinking about how I might interact and empathize with people helps me grow my emotional intelligence.

It’s also during my planning time that I identify my spotlight moments – the moments when I know my example is on display, where I need to maximize my excellence. Want to know a little secret? Being excellent isn’t about trying to be incredible at everything all the time – it’s about picking the right moments to maximize your effort and be disproportionately excellent.

So, altogether, if you do those two things for an hour each day, that’s seven hours. The eighth hour happens on Sunday afternoon, when I plan out my week. And that’s it. That’s how you get a massive edge over your peers in whatever you’re doing. Too few do it and stick with it, and that will make it all the easier for anyone who does stick with it to succeed.

He is also the recipient of the “Master of Influence” designation from the National Speakers Association (NSA), which honors his professionalism and public speaking ability.*

## ■ Authorities Seize Largest Stolen-Login Marketplace Site On The Dark Web

Earlier this year, the Department of Justice announced that they, along with other international authorities, had seized Slilpp, the largest site for stolen login credentials on the Dark Web. The site had over 80 million user credentials lifted from 1,400 service providers.

Authorities from four different countries all helped the FBI seize servers that hosted Slilpp. They also arrested and/or charged 12 people involved with operating the site.

Eighty million user credentials from 1,400 sites is a lot of sensitive information. That said, though, the Department of Justice still hasn't ascertained the full impact of the illegal activity on Slilpp. In the U.S.,

activity on the site led to almost \$200 million in losses – and that's just a tiny fraction of the total activity.

The fight isn't over, but this case is a big win against illegal login sale marketplaces. The Department of Justice hopes for more seizures like this one in the future.

## ■ The Best Tips For Training New Hires

The hiring process is stressful. You put in a considerable amount of work training someone for their role and hope

they'll become a responsible employee. As difficult as this process is, however, you can streamline it with these tips.

## Create A Scalable Guide For New Hires To Follow

Document all the responsibilities of the role and put them together in a concrete guide for new hires. This documentation will work especially well for visual learners, for recent graduates who are used to learning through guides and for non-native English speakers. In truth, though, anyone can benefit from having a set of principles to refer to.

## Draw Examples From Real Life

When training someone in what to do in a specific situation, provide actual examples of what you did in that particular situation in the past. New hires will have an easier time completing their work if they have a previous example that shows them what to do.

## Develop Your Interview Skills

Like great teachers, great leaders ask great questions to surmise if new hires are understanding their role. This will ensure that nothing gets lost in translation throughout the onboarding process.

We believe that experienced, reputable and fast responding IT support should be the standard.
